

Upgrading to EDS Skin and Module Collection

Conditions of upgrade:

- if during the past year you have bought any of our modules, you are entitled to a discounted purchase of EDS Skin & Module Collection
- the discount can only be obtained on the basis of a purchase within one year
- the discount can only be obtained for the purchase of the full collection, it cannot be obtained for the purchase of skins only

How to get the discount?

- to get the discount, you just need to ask for a coupon code from us
- we suggest that you ask for your coupon code early, as we need some time to process your request
- in most cases, you will receive your coupon code within 24 hours or sooner on workdays
- in your request for the coupon code, list the invoice numbers from your orders

An important note:

If you purchased the collection, we can't retroactively give you a discount you may have been entitled to. That's why you should request your coupon code on time. If you need to obtain it urgently, we recommend you to purchase only the skin collection without the modules and let us know about your purchase. We are going to calculate this purchase in the price you need to pay for the full collection and send you a corresponding coupon code. In the meanwhile, you can use the fully functional trial versions of the modules.

What is the amount of the discount?

Since EDS Skin and Module Collection comes with 1 year of free upgrades, the discount will depend on the amount and date of your previous purchase. We allow for the full amount of discount for the purchases made in the past 90 days.

Examples:

- for the purchase in amount of \$69,95 in the past 90 days, the discount will be the full \$69,95
- for the purchase in amount of \$69,95 completed 300 days ago, the discount will be \$12,45

(the amount you paid / 365)* remaining number of days up to 365

For the purchase of \$69,95 completed 300 days ago, the number of days up to 365 is 65

$(69,95 / 365) * 65 = 12,45$
